

## Worker - ResHealth registration

ResHealth is RSHQ's online solution for your coal mine worker health assessment (HA).

With ResHealth

- Your health assessment is quicker and more efficient
- You can access your HA report (previously section 4) as soon as the doctor completes it
- You can use a computer, tablet or mobile phone to complete your section.

Your employer will send you an email inviting you to register in ResHealth. You need to register in ResHealth before completing the worker section. For increased security, you must first verify your identity through [QGov](#).
